Daytime Phone (Optional): 507-261-3400

Public participation for the Federal, Minnesota, and Wisconsin permitting processes will be ongoing for the Hampton- Rochester- La Crosse 345 kV Transmission Project. If you sign up for the mailing list, you will be notified when opportunities to participate are being planned.

Please plan to continue your involvement in the process and provide your comments. We appreciate your input.

If you own property in one of the proposed corridors, please indicate all the existing uses of your property below:

☒ Agriculture

☒ Residential

☒ Conservation Easement

☐ Commercial

☐ Industrial

☐ Other: _____

Please describe any special uses or circumstances on your property that should be considered when assessing the Project. Please indicate the location of your property.

ONE OF THE CORRIDORES (HOLDEN TOWNSHIP
50th AVE (44755) GOES RIGHT OVER
OUR HOUSE

In your opinion, what are the most sensitive resources (biological, cultural, recreational, ect.) in the Project area and why?

COMMENT FORM

Public Scoping Meetings

We need your input. Please take a few minutes to provide your comments or questions for the USDA RUS Federal Environmental Impact Statement process and return your completed form today or mail by June 29, 2009. Your comments help in the planning and implementation of the project. **Thank you.**

Completing this form will automatically add you to our mailing list. If you prefer to not be on the mailing list, please check the box below.

☐ I do not wish to be on the project mailing list

Which meeting did you attend? CANNON FALLS & LECRESENT

Please check the following issues that are important to you for transmission line siting.

☒ Project Purpose and Need

☒ Visual / Aesthetic resources

☒ Proximity to residences

☒ Land use (agriculture, residential, recreation)

☒ Water resources (floodplains, river crossings)

☒ Biological resources (wildlife habitat, raptors)

☒ Historic and cultural sites

☒ Radio or television interference

☒ Noise

☒ Health and safety

☐ Other: PLEASE DON'T ALLOW THIS TO HAPPEN

What additional key issues should be addressed when assessing the potential impacts of this project?

Hampton • Rochester • La Crosse 345 kV Transmission Project

July 3, 2009

To Whom It May Concern: *STEPHANIE A. STRENGTH*

It is my wish that those who have the power to do so, act on my request to oppose the proposed plan to bring CapX 2020 transmission lines through Holden Township and throughout the state. I believe that there is no need this for project.

I-275-001

I-275-002

- Need should be based on what OUR state needs; not what is needed in LaCrosse or points east of.
- Coal is considered to be an environmentally unsatisfactory energy source because of gaseous (ie: CO₂ SO₂ NO_x and volatile metals) and solid waste products (ie: fly ash, bottom ash, FGD sludge).
- Combined with the +20% compounded loss that occurs when transporting over lines that stretch hundreds of miles it makes this proposed project unsavory at best.

On a local level, Holden Township has maintained a rural, agriculturally based economy because the residents have worked hard to insure that it is kept that way. The township has adopted resolutions that specifically address the preservation of its farmland. The community is active in preserving the heritage of the area agriculturally, environmentally, historically, socially, and as much so on the basis of esthetics.

I-275-003

- Agriculturally, there are many residents in our area who have struggled to maintain small farms that have been in the family for more than 150 years. They do so because they value this way of life. If the proposed transmission line goes through Holden Township, these small farms lose a greater percentage of their small fields to the inefficiencies of scale. Historically it has been an uphill battle for Minnesota's small farmers and the proposed transmission lines through Holden Township will only perpetuate the decreasing viability of our areas' small farms.
- Swaths 150' wide running hundreds of miles across the state along the path of these lines will be bulldozed and maintained cut free of trees as a ROW for transmission lines thus removing woodland habitat from our state's precious natural resources. By running these transmission lines down 56 through Holden Township rather than along the already established Highway 52 corridor, yet more woodland is destroyed and destroyed in a part of the state where woodland habitat is at a premium for our local hunters.
- Historically, we live in a part of the state that acts as a living museum for the small farming community much in the same way as re-enactments of

Your comment has been noted. The Draft Environmental Impact Statement will describe, in detail, project purpose and need. The justification document which has been accepted by the RUS is the Alternative Evaluation study which is available at:
<http://www.usda.gov/rus/water/ees/eis.htm>.

The Draft Environmental Impact Statement will be available on the RUS website at: <http://www.usda.gov/rus/water/ees/eis.htm>. Comments on the Draft Environmental Impact Statement will be solicited after its publication.

I-275-002

Your comment has been noted. Alternatives to the project will be addressed in the Draft Environmental Impact Statement.

I-275-003

Your comment has been noted. Potential impacts to social and economic resources will be addressed in the Draft Environmental Impact Statement.

I-275-004

Your comment has been noted. Potential impacts to vegetation will be addressed in the Draft Environmental Impact Statement.

I-275-005

Your comment has been noted. Potential impacts to recreational resources will be addressed in the Draft Environmental Impact Statement.

I-275-006

other historical events depict history. We live with such landmarks as the stagecoach stop (which is currently being renovated), the local country schoolhouse, century old churches with strong, active memberships, and small rural towns where business can be conducted with a handshake over a cup of coffee at the local coffee shop. This kind of historical "landmark" may not be obvious as a tangible part of the argument against transmission lines but can be easily vandalized by the sight of 150' towers and lines slicing their way through the countryside. There are those who may be forced to significantly alter or abandon a way of life that acts as this living history for all of us.

- Socially, our community acts and reacts to unsavory pressures that destroy or encumber our hard earned assets under the guise of "eminent domain". Public utilities are unique in that they are exempt from many of the eminent domain laws (chapter 117) restricting the taking of lands from one to give to another. In our view, this does not make the PUC answerable to the public for whom they serve.
- Esthetically we live among rolling wooded hills, oak savannahs, beautiful creek valleys, small farm fields, and pasture ground. We have chosen a quality of life that is reflected in these quiet esthetics. Just as others value a different life that reflects their particular needs, we have chosen the simplicity and fierce independence that we feel comes with and is unique to our area. It is not right that lifestyle choices of others should be granted preference over ours. We have listened to the representatives from CapX and have concluded that since they have not been willing to discuss the issue of need for points beyond Rochester and LaCrescent, we can only conclude that the need is NOT within our own state but with points east of us. Do we really want our state raped by a project that does nothing to enhance our own quality of life?

I-275-007

Sincerely,
Mark Lenway
